foretrack

The Smart way to track your vehicles and assets

How does it work?

- Simple to use
- GPS technology automatically polls the vehicle or asset every 1km or every turn greater than 45 degrees.
- Each user assigned a username and password
- Your account can be accessed from any PC that has internet access

Benefits

- Snapshot will show exact location of all your fleet.
- View historical or real time journey information for selected vehicle (s) or asset (s)
- End of day reporting that can be exported to excel for use in management meetings etc.
- 100% accuracy in locating vehicle (s) or asset (s)
- Give your clients improved client service by informing them exactly where a delivery is.
- The smallest product on the market, covert unit so potential thieves won't even know it's there.
- Will fit ANY model of transport

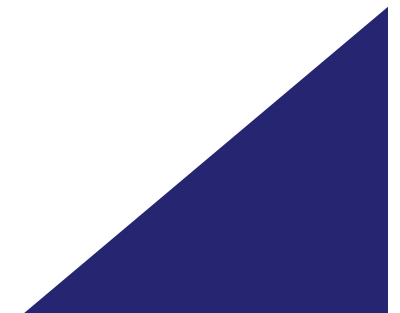

Features

- Geo-Fencing; Alarm certain locations (i.e. delivery addresses, head office) and an alarm is activated and recorded when the vehicle enters or exits the area. An update is sent by e-mail or SMS to the fleet administrator.
- Proof to clients that vehicles have been to a specified location at a certain time.
- May assist in the reduction of Insurance premiums
- Detailed Maps including road maps
- UK and European street mapping

Overview

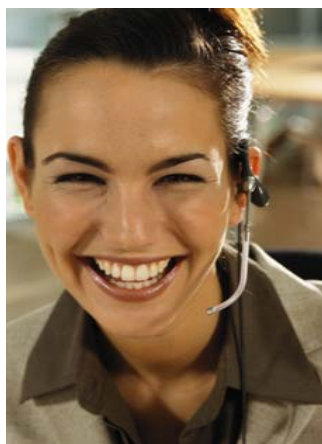

- 99% UK Coverage
- More Updates for your money
- Speedy Reliable Service
- 3 month history
- Top speeds and average speeds
- Exact Routes taken
